

BusinessMap® Checklists

BusinessMap is supported by a number of Checklists, User Guides and Manuals designed to secure the successful implementation and use of BusinessMap.

Checklist BusinessMap Installation

The Installation Checklist has been designed to secure the successful installation of BusinessMap. The checklist provides a step by step account of how to install BusinessMap and aids the super user in setting up users and user rights.

Checklist BusinessMap Roll-out Plan

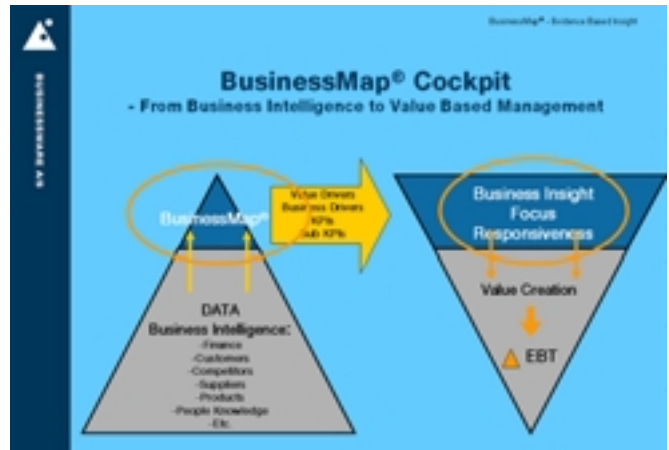

The Roll-out checklist outlines the different implementation phases and activities and has been designed to help the people driving the implementation of BusinessMap. It covers aspects such as current business procedures, IT-systems etc. Also the company's planning cycle is drawn up to ensure the fit between this, BusinessMap and other strategic activities.

Checklist BusinessMap Settings

The Settings Checklist helps to design, prepare and facilitate the configuration of BusinessMap. By gathering the necessary data clients with the same configurations can be up and running in no time.

BusinessMap User Guide

The User Guide provides a step by step account of how to complete a BusinessMap exercise, from segmentation right through to consolidation and reports.

BusinessMap Trainer Manuals

This consists of a Trainer and Super User Manual and has been written to assist BusinessMap Trainers. It contains information such as, prerequisites, step by step user training, background knowledge and PowerPoint slides.

Checklist BusinessMap IT Integration

The Integration Checklist secures the successful integration with the company's existing systems. It helps the user to set up automatic data migrations and optimises the use of existing data.

Checklist IT Technical Errors, Pains and Wishes

This checklist is a working document. Users can list technical errors, wishes and pains and BUSINESSWARE provides a conclusion to the individual entries.
